Ostuni, Italy · Available remotely

PROFILE

Self taught full stack web developer with experience in startup environments and freelance work, focused on fast, clean and maintainable digital products. I work across the whole stack, from database to interface, with a minimalist approach: no superfluous dependencies, light architectures, code that scales without becoming complex. Currently employed remotely at Agrisense, where I build the IoT web platform for agricultural devices with Next.js, React and Supabase. Active open source contributor with experience serving private clients across different technical domains.

EXPERIENCE

Agrisense

Feb 2026 - present · Remote

Full Stack Developer

- Development and maintenance of the web platform for agricultural IoT devices, used by farmers for real time crop monitoring and management.
- Responsible for the entire stack: API architecture with Supabase (authentication, PostgreSQL, realtime), front end with Next.js and React.
- Interfaces designed for rural contexts: data clarity, accessibility and stability under limited connectivity.
- Security, performance and scalability best practices inside an agile team.

Breakout Schematics: TradingView Indicator

Mar 2026 - May 2026 · Remote · Private client

Pine Script Developer · commissioned work

- Commissioned development of an advanced TradingView indicator that automatically detects high probability breakout patterns (SSA, S1, MUT) through an architecture of independent state machines.
- Tracks a configurable consolidation session, locks reference levels at close and inspects every candle for structured patterns with precise pip thresholds.
- Signal rendering with labels, triangular markers and native alert support; compatible with every timeframe and instrument (forex, indices, commodities).

Social Media Manager

2021 - 2022 · Ostuni, Italy

Local company · channel management and content production

- Direction and production of all visual content: video, photography and promotional graphics.
- Editorial calendar and publishing strategy defined to maximise reach and engagement.

Freelance · Sartoria Il Baco

Late 2024 · Castelfranco Veneto, Italy

Web Designer & Developer

- Design and development of an illustrated single page site built with React and custom CSS; UI prototyping in Figma.

SELECTED PROJECTS

Demido Studio

2026 · github.com/elpideus/demido-studio

Agentic LLM harness and multi purpose workspace

- Harness around large language models built as a general workspace: writes and reviews code, manages email and calendar, analyses markets and maintains a knowledge graph of every source it touches.
- Sub agent architecture with per agent skills and permissions, plus a graph explorer over structured data.

TeleVault

2026 · github.com/elpideus/TeleVault

Self hosted cloud storage on Telegram infrastructure

- Open source application that turns Telegram into a personal cloud vault: upload, download and organisation of files using Telegram servers as free storage.
- Direct integration of the Telegram APIs (MTProto), chunking for large files and a web interface for browsing content.

PeakPlay

2026 · github.com/elpideus/peakplay

Daily top one hundred songs worldwide

- Discover the top global songs updated daily, ranked from millions of streams.
- Open source project built with attention to performance and to architectural simplicity.

LiSpizzicusi.it

2026 · lispizzicusi.it

Custom WordPress theme and plugin

- Theme and companion plugin written for a folk group, with editorial needs handled in code rather than through a page builder.

TECHNICAL SKILLS

Languages	TypeScript · JavaScript · Java · Kotlin · Python · PHP · Bash
Front end	React · Next.js · Tailwind · HTML5 · SCSS / CSS · three.js
Back end	Node.js · Bun · Express · REST APIs · discord.js
